### REMARKS

The Examiner has requested copies of the references cited in Applicants' Information Disclosure Statement other than U.S. patents. For the Examiner's convenience, the previously cited references are cited in this Supplemental Information Disclosure Statement, and new 1449 forms are provided, so that the Examiner may acknowledge the references considered. In a number of instances, the publication dates and/or numbers of the references are corrected, as the application dates and/or numbers had been supplied. In those cases where a new publication number is cited, the previously-cited application number is indicated above parenthetically.

The papers previously supplied include copies of papers from two European Opposition proceedings. For the Examiner's convenience, the U.S. applications on which the European Applications are based, the European Applications, and the European Oppositions are described here briefly. Documents from the European Opposition proceedings are also provided.

#### The U.S. Applications:

This is a continuation of Van Gompel et al. Application Serial No. 08/600,317, filed February 13, 1996, issued May 14, 2002, as U.S. Patent 6,387,084; which is a continuation of Van Gompel et al. Application Serial No. 08/255,843, filed June 8, 1994, and now abandoned; which is a continuation of Van Gompel et al. Application Serial No. 08/954,524, filed September 30, 1992, and now abandoned.

Subject matter which is similar, but is believed to be distinct, is claimed in Van Gompel et al. Serial No. 08/892,744, filed July 15, 1997, now pending in Group Art Unit 3761 before Examiner Karin M. Reichle; which is a continuation of Van Gompel et al. Application Serial No. 08/954,102, filed September 30, 1992, and now abandoned.

#### The EPO Applications:

European Patent Application 93 115,757.2 was filed September 29, 1993, claiming priority of U.S. Application Serial No. 07/954,524, filed September 30, 1992 (ancestor of the

present Application). EPA 93 115,757.2 resulted in European Patent 0,595,047, which was involved in post-grant oppositions referred to below.

European Patent Application 93 115,848.9 was filed September 30, 1993, claiming priority of U.S. Application Serial No. 07/954,102, filed September 30, 1992 (parent of co-pending Application). EPA 93 115,848.9 resulted in European Patent 0,590,675, which was also involved in post-grant oppositions referred to below.

#### The EPO Oppositions:

##### EP 0,590,675 / EPA 93 115,848.9:

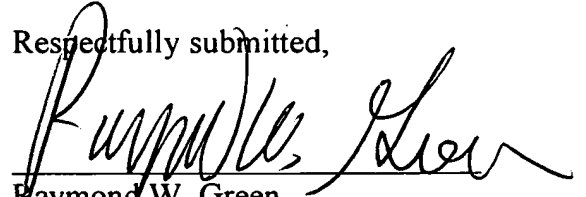

Three notices of Opposition to the grant of European Patent 0,590,675 / 93 115,848.9 were filed in February and March, 1998 (Exhibits 1-3). A response to the Oppositions was filed by the Patentee on October 1, 1998 (Exhibit 4). The Opposition Division of the EPO issued observations regarding the Oppositions on March 22, 1999 (Exhibit 5). The Patent was maintained with modified claims by decision dated July 19, 2000 (Exhibits 6 and 7). Two of the three opponents appealed the decision and filed reasons for appeal in November, 2000 (Exhibits 8 and 9). Patentee filed a response to the reasons for appeal on May 23, 2001 (Exhibit 10). No further papers have been issued by or filed with the EPO, and we are waiting for the assignment of an oral hearing date on the appeal.

##### EP 0,595,047 / EPA 93 115,757.2:

Two notices of Opposition to the grant of European Patent 0,595,047 / 93 115,757.2 were filed in January and February, 1998 (Exhibits 11 and 12). A response to the Oppositions was filed by the Patentee on August 20, 1998 (Exhibit 13). Replies were filed by both Opponents in January, 1999 (Exhibits 14 and 15). The EPO issued a summons to oral proceedings, with comments (Exhibit 16). A further response by the Patentee was filed March 31, 2000, submitting amended claims and an auxiliary request (Exhibit 17). European Patent 0,595,047 was revoked July 5, 2000, because the Opposition Division did not find support in the specification for the combination of features recited in our revised claims, although the features were individually disclosed (Exhibits 18-19). No appeal of the revocation decision was filed.

Copies of the references (including the EPO Opposition papers) now cited, and a Form PTO-1449 for the Examiner to initial to indicate review of the cited documents, are enclosed.
